

EXPERIENCE IS EVERYTHING

“The instructors are real world game developers who also happen to be professors. They bring their experience into teaching and mentoring... I experienced the most gentle and supportive environment I’ve ever experienced in an online course.”

Become a Game Developer

SRJC’s Game Development program offers certificate and degree pathways that integrate game history, game design, user experience, and coding with electives in fields such as three-dimensional modelling.

Students may decide to pursue four-year degrees or enter the workforce after the certificate as a confident and well-prepared professional.

For more information visit cs.santarosa.edu.
